Rafał Szczepanik

Front-End Developer

I have been interested in programming as a hobby for several years, but for the last 12 months I have been learning to turn this skill into a tool enabling me to start my first job as a Junior Front-End Developer. I have also broadened my knowledge of back-end technology and am currently expanding on these skills. The sources of my learning are, among others, Udemy courses and MegaK Bootcamp. Thanks to systematic work, I am able to acquire new knowledge in the field of programming every day. My strengths are ease in establishing interpersonal relationships and the willingness to constantly develop my skills. It would be my pleasure to work for your company.
